

Superior Metalforming Solutions

for All Major Machine Types

We manufacture the premier line of cylindrical dies and tooling solutions for Multi-Spindle, Cylindrical Rolling, and CNC Machines.

We Don't Have Customers — We Have Partners.

Our team of dedicated engineers is equipped with intensive, hands-on training and experience. We understand what you need, and can customize jobs to meet your exact specifications.

Your success is our priority, which means you'll receive:

Innovation

**that makes your
life easier**

Instant access

**to engineers to work
with you on part design
and specifications**

Customization

**for almost every product
to meet your exact needs**

Cylindrical Dies

Types of Form Dies

Helical & Annular

- In-Feed (Plunge)
- Through-Feed
- Double Taper

Form Die Material

ALL Tool Steels

(D2, DC53, K340, M2, M4, M42, etc.)
Optional Coatings

Machine Types

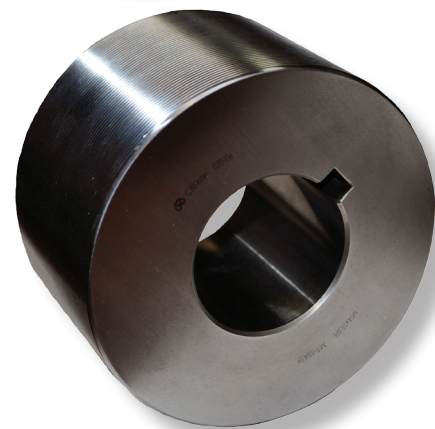

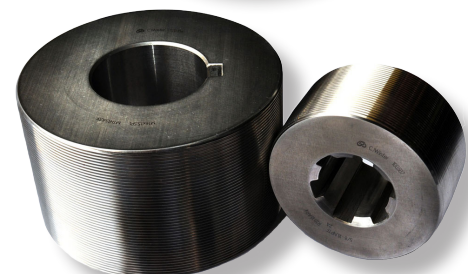

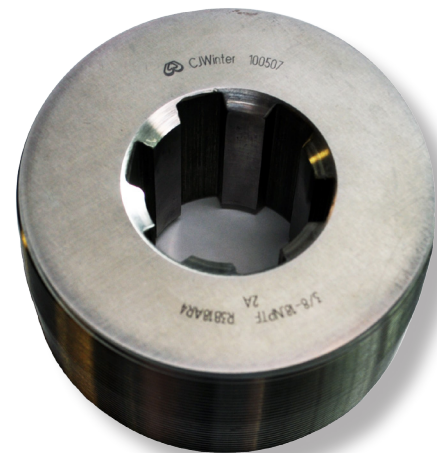

- Tesker
- Kinefac
- Landis
- Nissei
- Seny
- Reed
- Escofier
- Many more

Forms

- All standard forms and full spectrum of special forms
- UNR, UNJ, ACME, Buttress, Worm
- NPT, NPTF, BSPT, BSPP
- MATHread
- Knurls (Standard, Diamond, Conical)

Edge Finish

- Standard —
30°, 45°, or 60° Chamfer Angles
- Special R³ Radius Root Chamfer
or Custom Chamfer Angles

Speedy delivery and
the shortest lead times

Flawless quality
and meticulous
attention to detail

Superior service and
individual attention
